

**Make the world of embedded systems safer with us!**

## Full-time position in Frankfurt/Main Area IT and Application Tester (f/m/d)

**Progress, innovation, safety - that's what tecmata stands for!** We develop & test the software of tomorrow - and guarantee quality for well-known customers. As independent auditors, we fix software errors in advance and ensure faultless software functionality – where it counts: in safety-critical braking and steering systems for cars, in medical devices or in automation technology.

Would you like to make the world of tomorrow a little safer? Then put your know-how to good use in one of our expert teams in exciting and high-level projects.

### **You can ensure success with the following:**

- » Creation and execution of application tests and GUI tests in the Windows 10 environment
- » Definition and creation of the test strategy in direct coordination with the application development
- » Requirements-analysis during the concept and implementation phase
- » Creation and execution of the test report
- » Development and construction of environments for test automation

### **You have demonstrated your abilities in these fields:**

- » You have a degree as an Electrical Engineering or Natural Sciences or comparable
- » You already have some experience in application testing
- » You are ISTQB Certified Tester or have comparable training
- » You already have some practical experience in running tests and have learned how to estimate test effort

### **This is what you can look forward to!**

Our common goal drives us: As a team, we are optimally networked, we help each other at all times and exchange our expertise - refreshingly honest and trusting.

- ➔ **Company Benefits:** salary package for a modern company, full-time contract, central contact person for organizational matters, company pension plans & occupational supplementary health insurance, mobile work & flexitime, 30-day paid vacation per year

Write your success story with tecmata and expand your professional horizons with each new project and valuable further education. All this in a friendly atmosphere with team events and a lot of creative freedom. Discover our versatile work environment and join us for the secure engineering and IT solutions of tomorrow - welcome to the team!

### **Future needs diversity - diversity needs you!**
