

Make the world of embedded systems safer with us!

Full-time position in Frankfurt/Main Area

Requirements Engineer for Driver Assistance Systems (f/m/d)

Progress, innovation, safety - that's what tecmata stands for! We develop & test the software of tomorrow - and guarantee quality for well-known customers. As independent auditors, we fix software errors in advance and ensure faultless software functionality – where it counts: in safety-critical braking and steering systems for cars, in medical devices or in automation technology.

Would you like to make the world of tomorrow a little safer? Then put your know-how to good use in one of our expert teams in exciting and high-level projects.

You can ensure success with the following:

- » You will work on highly innovative systems and products in a global team environment
- » You will support the requirements analysis of new and changed system functions
- » You will assist in the development of methodical approaches to system design
- » You have to pay attention to technical feasibility and testability of system requirements
- » You will manage and maintain requirements and changes in professional tools

You have demonstrated your abilities in these fields:

- » You have a degree in electrical engineering, computer science, mechanical engineering or natural sciences or comparable
- » You ideally have experience with (safety-related) vehicle functions
- » You have the ability to think into technical systems
- » You have good knowledge of hardware and software
- » You have experience as a requirements engineer

This is what you can look forward to!

Our common goal drives us: As a team, we are optimally networked, we help each other at all times and exchange our expertise - refreshingly honest and trusting.

- ➔ **Company Benefits:** salary package for a modern company, full-time contract, central contact person for organizational matters, company pension plans & occupational supplementary health insurance, mobile work & flexitime, 30-day paid vacation per year

Write your success story with tecmata and expand your professional horizons with each new project and valuable further education. All this in a friendly atmosphere with team events and a lot of creative freedom. Discover our versatile work environment and join us for the secure engineering and IT solutions of tomorrow - welcome to the team!

Future needs diversity - diversity needs you!
