

Make the world of embedded systems safer with us!

Full-time position in Frankfurt/Main Area

Software Integration Engineer Automotive (f/m/d)

Progress, innovation, safety - that's what tecmata stands for! We develop & test the software of tomorrow - and guarantee quality for well-known customers. As independent auditors, we fix software errors in advance and ensure faultless software functionality – where it counts: in safety-critical braking and steering systems for cars, in medical devices or in automation technology.

Would you like to make the world of tomorrow a little safer? Then put your know-how to good use in one of our expert teams in exciting and high-level projects.

You can ensure success with the following:

- » Assist you in developing software components and automated software testing
- » Integrate and configure software components for MultiCore ECUs
- » Analyze and document the test results, and report errors and deviations
- » You coordinate your activities with the development team and the software project leader

You have demonstrated your abilities in these fields:

- » You have a degree in one of the following areas: electrical engineering or comparable
- » You already have some background in Embedded Software development, as well as in-depth knowledge of the C programming language and 32-bit μ C architectures
- » You have a good understanding of software development processes as well as pending quality standards (review, module test, integration test)
- » Ideally, you already have some experience in software integration testing and HIL systems

This is what you can look forward to!

Our common goal drives us: As a team, we are optimally networked, we help each other at all times and exchange our expertise - refreshingly honest and trusting.

- ➔ **Company Benefits:** salary package for a modern company, full-time contract, central contact person for organizational matters, company pension plans & occupational supplementary health insurance, mobile work & flexitime, 30-day paid vacation per year

Write your success story with tecmata and expand your professional horizons with each new project and valuable further education. All this in a friendly atmosphere with team events and a lot of creative freedom. Discover our versatile work environment and join us for the secure engineering and IT solutions of tomorrow - welcome to the team!

Future needs diversity - diversity needs you!
